[Hospital Admin & Super Admin](#12-hospital-admin--super-admin)

1. System Overview & Login

HPBMS is a multi-hospital healthcare platform where each hospital operates under its own web URL (e.g. `https://your-hospital.com/metro-hospital/login`).

How to Log In

1. Open your hospital's specific login link or the main portal login page. 2. Select your account type / enter your credentials:

- **Staff & Admin:** Enter your registered Email / Mobile / Employee ID and Password.
- **Patients:** Enter your registered Mobile Number and Date of Birth (DOB).
- **Guardians:** Enter Guardian Mobile Number, Patient Mobile Number, and Patient UHID.

3. Click **Log In**. The system will automatically direct you to your role-specific dashboard.

Top Navigation & Notifications

- **Notification Bell (Top Right):** Shows real-time unread alerts.

- Click any alert to navigate to its details.
- Click the **X (Dismiss)** icon next to an alert to remove it.
- Click **Clear All** to clear all unread alerts at once.
- **Sidebar Badges:** Show active pending work items for your role (e.g., 'Prescription Queue (3)'). Count decreases automatically as you complete each task.
- **Online / Offline Toggle:** Available on staff dashboards to toggle your availability for new patient assignments.

2. Patient Portal Guide

The Patient Portal allows patients to view their medical history, track consultations, access test reports, and view medical bills.

Accessing the Patient Portal

- **Login Credentials:** Mobile Number + Date of Birth (DOB).
- **URL:** `/:hospitalDomain/patient/dashboard`

Key Patient Features

🏥 Active Admission & Live Queue

- **Live OPD Queue:** See your current token number and estimated wait time for your doctor consultation.
- **Inpatient Admission Status:** If admitted, view your current Ward Type, Bed Number, and assigned Care Team (Primary Doctor and Attending Nurse).

📄 Treatment & E-Prescriptions

- **Prescription History:** View all digital prescriptions issued by your doctor. Includes medicine name, dosage, frequency, and instructions.
- **Doctor Clinical Notes:** Access diagnosis notes and follow-up advice.

🧪 Lab & Radiology Reports

- View pathology lab test results and radiology scan reports (X-Ray, MRI, CT, Ultrasound) as soon as they are finalized by the hospital.
- Download or print official diagnostic report PDFs.

🔔 Amenity & Assistance Requests

- If currently admitted in a hospital ward, send direct requests for:
 - 🍽️ Food & Water
 - 🧹 Housekeeping / Cleaning
 - 👩 Nurse Assistance
 - 🛏️ Linen / Bedding change

💳 Billing & Payment History

- View itemized daily hospital bills, lab charges, pharmacy charges, and room tariffs.
- Download payment receipts for settled bills.

3. Guardian Portal Guide

The Guardian Portal allows family members or appointed care guardians to stay informed about an admitted relative's health status and assist with care requests.

Accessing the Guardian Portal

- **Login Credentials:** Guardian Mobile Number + Patient Mobile Number + Patient UHID (Hospital Registration Number).
- **URL:** `/:hospitalDomain/guardian/dashboard`

Key Guardian Features

Patient Admission Status Overview

- See at a glance whether your relative is admitted in OPD, IPD Ward, or ICU.
- View assigned Primary Doctor, Attending Nurse, Ward, and Bed details.

Real-Time Doctor Updates

- Access clinical updates posted by attending doctors after daily ward rounds.
- View prescribed medications and treatment schedules.

Request Nurse Help & Support

- Submit quick care requests to the ward nursing station on behalf of the patient:
- Request immediate nurse visit.
- Request food/water or restroom support.
- Escalation alerts if a request is delayed.

Emergency Assistance Button

- If an urgent emergency occurs while visiting the patient in the ward, press the **Raise Emergency** button to alert the floor nursing team immediately.

Billing & Online Payment

- Review active hospital bill charges (Medicines, Tests, Tariffs).
 - Pay outstanding balances online.
-

4. Reception & Patient Registration

Key Duties

- **Patient Registration:** Register new patients with demographic data, phone number, and emergency contact details.
- **Duplicate Prevention:** The system automatically checks by phone, email, and ID to prevent duplicate patient records.
- **OPD Token Calling Desk:** Issue sequential tokens for doctor consultations, assign waiting patients to active doctors, and manage queue positions.

5. Doctor Workflow & E-Prescriptions

Key Duties

- **Doctor Availability:** Toggle **ONLINE / OFFLINE** and set Cabin Number.
- **Live Queue:** Open waiting patients, record EMR Chief Complaints, Vitals, and Diagnosis.
- **E-Prescriptions:** Issue digital prescriptions with automatic FEFO stock checks.
- **Lab & RIS Orders:** Order Pathology and Radiology tests with 1-click.
- **Department Responses:** Receive alerts when test reports or pharmacy substitution requests are ready for review.
- **Finalize Treatment:** Complete consultation to automatically forward charges to Billing.

6. Laboratory & Diagnostic Test Workflows

Key Duties

- **Pending Test Queue:** Receive lab test orders ('BLOOD_TEST', 'URINE_ANALYSIS', 'CULTURE', etc.) placed by doctors.
- **Sample Processing:** Mark sample collected → in progress → upload test findings and report PDF.
- **Doctor Review Sync:** Uploading the final report automatically notifies the requesting doctor.

7. Radiology & Imaging (RIS)

Key Duties

- **Imaging Requests:** View pending X-Ray, MRI, CT Scan, and Ultrasound orders.
- **Scan & Report Upload:** Attach DICOM files/images, enter radiological impressions, and finalize reports.

8. Pharmacy & Inventory Management (FEFO)

Key Duties

- **Dispense Queue:** Receive e-prescriptions sent by doctors.
 - **FEFO Auto-Allocation:** Automatically picks medicine batches expiring earliest to prevent wastage.
 - **Stock Adjustment & Deduction:** Dispensing automatically updates inventory counts and logs stock adjustments.
 - **Medicine Substitutions:** Request alternative medicine approvals from doctors if prescribed medicine is out of stock.
-

9. Nursing & Inpatient (IPD) Care

Key Duties

- **Bed Matrix Console:** View ward bed occupancy (Available, Occupied, Cleaning).
 - **MAR Log & Vitals:** Record patient vital signs (BP, Pulse, Temp, SpO2) and log scheduled medication doses.
 - **Patient Requests:** Respond to in-bed requests (Food, Water, Nurse Call) from Patients and Guardians.
-

10. Billing & Cashier Desk

Key Duties

- **Consolidated Invoices:** View automatically aggregated charges from Pharmacy, Lab, RIS, IPD Room Tariffs, and Doctor Consultations.
 - **Payment Collection:** Process Cash, Card, UPI, or Insurance payments and issue official receipts.
-

11. Emergency & Code Blue Response System

Key Duties

- **Code Blue Modal:** Triggers a high-priority global popup alert across active staff screens when an emergency is raised.
 - **Response Tracking:** Designated emergency staff click "Accept Emergency" to log responder identity, timestamp, and resolve the alert.
-

12. Hospital Admin & Super Admin

Key Duties

- **Hospital Admin:** Manage staff accounts, assign roles/permissions, set up department tariffs, monitor operational reports, and manage subscription plan capacity.
- **Super Admin:** SaaS platform owner console to provision new hospital instances, configure global subscription plans, monitor system health, and review audit logs.
